

Would you like to join the fight against breast cancer?

Drive new discoveries in
breast cancer with

FLEX

Join FLEX and help us personalize medicine

FLEX is a large-scale observational study of recently diagnosed breast cancer patients, aimed at discovering more about how breast cancer differs from patient to patient.

Women and men who have been diagnosed with stage I, II, and III invasive breast cancer are eligible.

Your participation has a **BIG** impact. Ask your doctor about FLEX today.

The FLEX study is being conducted at:

ABC Cancer Center
1234 Cancer Center Dr.

FLEX

Please contact Jane Coordinator at Jane.
Coordinator@study.com for more information

Research studies are the gateway,
and **YOUR GENES** can be the **KEY**
to unlocking new discoveries.
